ROPE ENGINEER

At Fiber-Line, we understand that our greatest asset is our people. Our mission is "treat others the way you want to be treated". We offer competitive compensation, comprehensive benefits and opportunities for professional growth and development. If you are interested in joining a growing company and enjoy solving complex challenges, consider joining our team!

This position is available immediately in our Hatfield, Pennsylvania location.

We are seeking an individual who is a creative self-starter with strong problem-solving ability and initiative who will provide technical expertise to help spearhead the company's growing initiative to produce high performance, synthetic fiber ropes. This individual will also serve as a focal point for product design, production, testing, and technical sales support for rope products in accordance with the company's market diversification and growth ambitions.

Essential Duties and Responsibilities include: Responsible for the design of synthetic fiber ropes which meet customer performance requirements. 1. Responsible for directing manufacturing operations related to rope production and testing.

2. Investigate and benchmark the performance of various termination methods, including new developments.

3. Provide technical support to sales personnel, including attending customer visits.

- 4. Commission new and oversee maintenance of existing applicable equipment SOPs and work in conjunction with the Training department to ensure proper training of applicable personnel.
- 5. Work closely with Production and Research and Development staff to coordinate execution on projects and troubleshoot operations issues.

Qualifications:

Must have a strong track record of wire and/ or synthetic fiber rope design and manufacture.

Knowledge of various wire rope applications and termination types, with familiarity of material selection for a given application.

Knowledge of wire rope distributors and synthetic sling fabrication.

Must be "hands-on" and capable of splicing, swaging and other termination fabrication.

Testing experience with break strength, elongation and stress/strain measurement, proof testing and bending fatigue.

Solid foundation in ASTM standardized testing methods and ISO9000 quality systems.

If you have a B.S. in Mechanical Engineering or a related field and a minimum of five years industrial experience in wire and/or synthetic fiber rope design, please send your resume and cover letter to: tderugeriis@fiber-line.com for consideration.

VP SALES & MARKETING

THE COMPANY: Our client is a private business and a leading supplier/manufacturer of primarily industrial product and secondly consumer products to a North American customer base. The company is looking to strengthen their existing senior management group with the appointment of a VP Sales & Marketing to lead and motivate the sales team to the next level of revenue, gross margin and profitable growth.

THE POSITION: VP Sales & Marketing will assume full management responsibility for the strategic future sales growth of the business, sales team leadership and associated marketing, telesales and administration support. Maintaining the very best levels of customer service and account management to the existing customer base, the VP Sales & Marketing will identify and target new opportunities to drive sales revenues and the profitable growth of the company to the next level.

THE PERSON: The VP Sales & Marketing will have previous experience of selling industrial products to large volume North American purchasers. In 1924, Germany's 'Adolf Bleichert & Co.' celebrated its 50th Anniversary. By the time of this occasion, the company had designed and built the world's record holding wire ropeways: Longest and highest elevation

(Argentina); Length of system over water (New Caledonia); Steepest (Tanzania); Highest capacity (France); Northernmost (Norway); and, Southernmost (Chile).

Written by the great-great grandson of the company's founder, this book includes over 100 pictures and detailed engineering drawings that explore the legendary company's history, and several of its record-holding systems.
