

process applications in a manufacturing environment, not intended for lifting

- On-Demand Sheaves: 6" to 12" sheaves, made in the USA, delivered in three (3) days or less to your shop or your job site

- Custom Sheaves: What you specify is what you get, made to order to match your technical requirements

"We can offer our customers an option for pairing Loos & Co., Inc. cable and wire rope with a quality line of pulleys and sheaves," says Robert Davis, Vice President, Sales and Marketing for Loos & Co., Inc. "We pride ourselves in providing the performance our customers need, when they need it. Offering pulleys and sheaves broadens the products and solutions we bring to the markets we serve."

All pulley and sheave products are available for immediate order. Additional information about these and other Loos and Company products can be obtained by calling 800-533-5667 or visiting www.loosco.com.

Green Pin® introduces the Power Sling® Shackle: save up to 20% on wire rope costs

Green Pin® introduces the Green Pin Power Sling® Shackle. The Green Pin Power Sling® Shackle lets customers save up to 20% on synthetic- and wire

Green Pin® Power Sling® Shackle from Van Beest

rope costs thanks to its revolutionary design (patent pending). It has an optimal D/d ratio and the widest crown (+10%) in the industry. About the latest Green Pin® innovation, Vice President of Sales & Procurement Evert van Beuzekom said: "The transport and installation industry continues to be focused on cost effectiveness, while obviously not wanting to make any compromises on quality and safety. The ability of the Green Pin Power Sling® Shackle to save customers up to 20% on synthetic- and wire rope costs is thus very timely and gives them a real competitive advantage".

On top of its cost saving benefits, the

Power Sling® offers unparalleled safety and ease of handling. Each shackle has been individually proofload tested to twice the Working Load Limit; more than any other competing product. Long-term performance is guaranteed by extensive fatigue testing (over 40,000 cycles). Material characteristics have been thoroughly examined, both internally and in the shackle's surface, by MPI-tests, ultrasonic inspection and X-ray tests. Furthermore, the Power Sling® offers great handling thanks to the lower body weight, multiple handling points and RFID-chips in both shackle body and pin.

The Green Pin Power Sling® is available in a range from WLL 125T to 1250T. The Power Sling® can be supplied with a variety of certificates. More information (product video, brochure) can be found on the special webpage: greenpin.com/power.

Green Pin® is the leading brand for premium synthetic- and steel wire rope accessories such as shackles and turnbuckles and is widely known for its high quality and superior availability. Green Pin® is a brand of the Van Beest Group, the Dutch manufacturer of high quality rigging equipment. The Van Beest Group has offices in The Netherlands, Germany, France and USA, and stock holding distributors in more than 90 countries worldwide.

Eriez® SafeHold® Lifting Magnets improve safety and increase productivity

When properly installed and operated, SafeHold® Permanent Lifting Magnets from Eriez® are safer and more efficient than other mechanical material handling devices. Customers who have upgraded to SafeHold magnets from older manual magnets report

Eriez® SafeHold® Lifting Magnet

decreased workplace injuries and increased productivity.

Operators utilizing an old-fashioned manual-locking magnet suspended from an overhead crane to move heavy steel plates are often forced to reach
