tails his "7 Values of Ingenuity™." All seven, he says, hinge on what he calls *leadership credibility*.

1. *Respect* for employees as well as customers

2. *Integrity*, which means telling the truth and trusting that your people can deal with it

3. *Teamwork* which embraces disagreement and conflict

4. *Community* – strengthening the internal organization and reaching out to help the wider community

5. *Commitment* by leaders as evidenced by their motivation, leadership and ambition

6. *Excellence*, which requires revisiting company goals, i.e., what is the cost and what are the gains?

7. *Innovation* – meaning not just product changes but a review of "every aspect of the process used to make your product"

"American Manufacturing 2.0 lays out a road map for a renewal of this vital industry," says Blue. "I believe there is no reason why we should accept our current state of affairs. To think of a resurgence of manufacturing in America is not science fiction. It is reality, and this book will show you how and where it is happening today and how it can grow stronger in the future."

Steven L. Blue is the President & CEO of Miller Ingenuity, a global supplier of mission-critical solutions in the transportation industry. Blue is a nationally recognized expert in transforming business into global powerhouses by showing how to double and even quadruple growth. He regularly provides insight for leading media and industry outlets, including FOX, BusinessWeek, Forbes, The Huffington Post, Entrepreneur, AMA, Europe Business Review, and The Wall Street Journal. He is also Founder and monthly contributor to American City Business Journal's popular "The League of Extraordinary CEOs," where he interviews fellow CEOs responsible for generating rates of growth from 200 to 2,000% in less than three years.

Through his keynote addresses to audiences, ranging from CEO Clubs International to Harvard University, Blue provides insights for the business community on how to out-do, out-innovate, and out-perform the competition.
