LGH, said: “If you want to be regarded as a serious player in the lifting market, being a fully-fledged LEEA member is vital. The organization provides all members with advice and support on virtually any related topic concerning lifting, which is simply not available elsewhere. LEEA works closely with the HSE [UK Health and Safety Executive] and is widely regarded as

the lifting standard—not only in the UK but worldwide.”

LEEA has been providing specialist training services to its members for over 50 years and has its own dedicated training centre in Huntingdon, UK. LGH personnel are expected to undertake varying levels of these courses depending on the extent of their exposure to product and the requirement of an

individual to understand best practice in advising customers on what products to use.

ISO 9001:2015, meanwhile, is based on a number of quality management principles including a strong customer focus, the motivation and implication of top management, and continual improvement. Smith called it the “pinnacle of standards” and a “minimum benchmark” for any business dealing with safety-critical products.

He added: “Given the nature of our product range, existing and prospective customers expect us to have the latest 2015 specification of ISO 9001. Further, accreditation offers them peace of mind that they are sourcing lifting and rigging equipment from a highly disciplined organization. Achieving it involved a complete review of our processes and systems, and documentation of findings in a quality management system.”

Colin Naylor, Managing Director at LGH, said: “LGH continues to grow and as we enter our second full year of trading our employee count has reached 25 with an additional five recruits scheduled to join in the next few months. Additional commercial vehicles have also

LGH's Phil Smith (left), commercial manager; and Colin Naylor, managing director, with the ISO 9001:2015 certificate.
