

Still made in the USA!

POC 3500-94
3 1/2" capacity, power-operated
Cuts 3 1/2" wire rope in 40 seconds!
Also available in 2 1/2", 1 3/4", 1 1/8"

Model 1
3/4" capacity

Model 2
1 1/2" capacity

Model 1A
1 1/16" capacity

POC 2500-80
2 1/2" capacity,
power operated

POC 1125-80
1 1/8" capacity, power-operated

C-1750
1 3/4" capacity

quirement for a tandem crane lift. The installation vessel, however, had a single crane so to simulate the installation lift a single point lift was required. Schwab explained that the structures land on pre-installed guideposts and piles on the seabed so the structures require a very tight tolerance on installation level/trim.

To achieve a simulated offshore single point lift, Modulift provided a MOD250/400 spreader beam and associated rigging to 'join' the two site cranes together using an inverted spreader bar arrangement. The SUB 380 spreader bar on each structure was connected to the structure via high performance synthetic slings and ROV-friendly shackles to form the installation rigging arrangement on the structures.

Once subsea the Manifolds will act to combine power, communications, service fluids and production pipework from multiple gas wells into a single main pipeline/umbilical system.

**ALL Family of Companies
Named New Authorized
Dealer for Maeda Mini Cranes**
*Tiny but mighty cranes offer high
performance and tight-spot versatility*

The ALL Family of Companies has been named the new authorized dealer

for Maeda Mini Cranes for the territory of Illinois, Indiana, Ohio, Minnesota, Wisconsin, and Ontario, Canada. ALL Crane will sell and service Maeda's full line including spider cranes, knuckle boom cranes, and crawlers.

As authorized dealers for many major manufacturers, ALL recognizes the value in adding new names to the roster with the potential to make customers' jobs easier, more efficient, and more cost effective. As an authorized Maeda dealer, ALL is committed to offering extensive product and service training support to ensure customers can rely on their efficiency, durability, and productivity.

Game-changing Maeda Mini Cranes have been engineered, designed, and manufactured in Japan since the company's founding in 1962. These ultra-compact machines are known for excellent performance in tight spots where other cranes simply can't go. Some are as little as two feet wide. The construction industry especially values these small cranes for their ability to be placed high up in a structure and assist with glazing and curtainwall installation.

Although Maeda manufactures the most compact crane models in the industry, they have loaded them with features

normally found on larger cranes. These include full load moment indicators (LMI) and custom outrigger programs.
