

type of ONE WAY clutch has been associated with the best hoist in the market as it assures any load can be lowered.

b) Grade 80 zinc plated load chains are being phased into production replacing the classic black finish. Best of all, the new zinc plated chain is made available without price increase.

c) LC series Lever Chain Hoist are now available with Shipyard Hooks for use in applications where tip loading is

Badger LC Series Lever Hoist with optional Shipyard Hook from All Material Handling

required. The new Shipyard Hook option is made available at no extra charge.

Visit the AMH web site, www.allmaterialhandling.com to learn more about the Badger hoist and many more material handling products available from dealers located throughout the Western Hemisphere.

A Solid Grasp on Safe and Easy Lifting

Green Pin® is proud to present its next generation of lifting clamps. Our new range has been designed to offer greater ease of use. Handling and maintenance

Green Pin® Lifting Clamp from Van Beest

could not be simpler while the products' sturdy build offers peace of mind. What is more, our new vertical and universal clamps are one-third lighter than their predecessors. Of course, Green Pin® Lifting Clamps come complete with a five-year warranty and fast delivery. Safe, simple, rugged and reliable. And fully integrated into the existing Green Pin® range of products.

For more information, download the brochure and product updates from their website at www.vanbeest.nl.

New CM Lodestar VS Electric Chain Hoist Harnesses the Power of Intelligent Lifting

One-of-a-kind hoist puts the power to monitor and adjust hoist performance at your fingertips

Generations of users have relied on the Lodestar electric chain hoist for the durability and reliability it provides for lifting applications. Now, this iconic hoist from Columbus McKinnon Corporation, a leading designer, manufacturer and marketer of material handling products, systems and services, is better than ever, combining the Lodestar's industry-leading design with the best-in-class features of Magnetek's premier variable frequency drives.

Equipped with the Magnetek IMPULSE® G+ Mini drive, the Lodestar VS features CM HI-Tech™ (Hoist Interface Technology) – one of the easiest to use computer interfaces on the market developed exclusively by Columbus McKinnon. CM HI-Tech gives operators the ability to quickly and easily adjust hoist speed and performance parameters to deliver the precision load control your application demands.

"We designed the Lodestar VS to put the information you need at your fin-
