

Pacilio, President of Lift-All. "We have spent a lot of time and testing to understand and differentiate cutting from abrasion and their effects on slings and we have developed patented solutions to these problems. Our goal is to help educate our consumers and help them to be as safe as possible".

The new Lift-All catalog contains an entire section devoted to sling protection including the newly patented line of Cut Protection Products designed for a variety of applications and sling types. The Edge Defender is constructed of multiple layers of protection material with a Kevlar binding. The Edge Defender Flex-Plus is made with a double layer of Dyneema and is offered in a flat and tubular style. The Sling Shield, made from aluminum, offers a magnetic attachment that holds position against steel loads for easier rigging. These styles all have Velcro attachments which allow for removal, so the slings can be inspected.

Lift-All Co. has been manufacturing quality lifting and load securement products for over 50 years. With five manufacturing plants found across the USA, a leading Customer Service Department, highly qualified Engineers, and a solution oriented Field Sales Department, the support you need with the safety you deserve is only a phone call away.

Warning Labels Now Available In Spanish

The Wire Rope Technical Board has published Warning Tags in Spanish. The product is the FLAT tag, printed in English on one side and Spanish on the other. These warning labels were designed by the Wire Rope Technical Board for use with all wire rope products. A warning label should accompany all wire ropes and wire rope slings provided to the user. The labels are available in packages of 250 at \$60/package. The flat version is ideally suited for stapling to the flanges of wood reels.

In addition, the WRTB is in the process of translating the Wire Rope and Wire Rope Sling Safety Bulletin into Spanish. We hope to have this product available soon.

Other materials from the WRTB include ASTM standards related to wire rope; Wire Rope User's Manual, Wire Rope Sling User's Manual; Wire Rope Inspection Guidelines; Wire Rope and Wire Rope Sling Safety Bulletin; other

types of Wire Rope Warning Tags and Labels; and Groove Gauge Sets.

For more information and a copy of the order form visit the WRTB website at www.wireropetechnicalboard.org or by contacting WRTB Fulfillment at 816-676-0811 or larrymeanspe@gmail.com.

Larson Electronics Releases 9000-watt Air Cooled Gas Powered Portable Generator with Electric Start

Larson Electronics, industrial grade lighting leader, released an air cooled 15 horsepower 9000-watt generator, powered by gasoline that operates on 120/240 volts AC with optional 12 volts DC. This generator features seven outlets including four 3-prong outlets, two twist locks and one car charger, and is mounted on a wheeled base for easy movement throughout industrial worksites.

The ACGE-9000-WC-120.240 from Larson Electronics is a portable 9000-watt generator with an electric start that features quiet operation and up to 9 hours of run time on a single tank of gasoline from a 420 OHV engine. This 15-horsepower generator is air cooled and includes four 120V 20A three-prong outlets, one 120/240V 30A twist-lock (L14-30), one 120V 30A twist lock, and one car-charger-style 12V DC outlet for accessory attachments. These outlets allow operators to run tools and other equipment in addition to lights.

"The most notable feature of this portable generator is the variety of outlets and combination of high-voltage and

9000-watt air cooled generator from Larson Electronics

12VDC," said Rob Bresnahan, CEO of Larson Electronics LLC. "The flexible options allow operators to run multiple pieces of equipment from a single power source."
