ing the frames up using two Genie lifts and a lift truck with fork extensions, sourced from his company. He oversaw installation alongside Gary Coleman, Site Engineer at RSS.

Shaun Wilkinson, Services Manager at Stelrad Radiator Group, said: "We are very pleased with the result. It was important for us to implement a system

that promoted sound lifting technique and sustained good health and safety practices. Previously, these problematic handling tasks had to be carried out manually. I use RSS for all our lifting equipment on site, including slings, chains, and specialist lifting gear."

The full scope of work covered supply, installation, and proof load tests. Upon

completion, RSS conducted those tests to 625kg with a recorded deflection of 1mm. The installation took four-and-a-half days to complete. Initially, Stelrad ceased production to accommodate the job, but operations resumed for the last two days and both companies had to work around each other.

Local firm, Regional CAD Systems Ltd, of Sheffield, manufactured the goalpost runway systems and beams. Stelrad manufactures and distributes 2.5 million radiators a year from its Mexborough site and offers standard steel panel radiators as well as decorative and designer radiators and the UK's leading range of low surface temperature radiators. It has been manufacturing steel radiators since 1936.

ALT Sales Corp. Becomes Retail Distributor of Manitex Articulating Cranes

Effective immediately, ALT Sales Corp., headquartered in Richfield, Ohio, will become the newest retail distributor in the fast-growing Mani-tex Articulating Crane Distribution Network in the U.S. and abroad. Manitex International, Inc. is a leading international provider of truck and
